

Exporting Reports to Excel

Article Number: 188 | Rating: Unrated | Last Updated: Mon, Aug 25, 2014 at 1:41 PM

In Remark Office OMR 2014 and later you can export all of the reports that do not require your interaction to the Excel format (response and comparative reports are excluded). When you click Export Excel from the task pane, you are prompted for a file name and location. Then the reports are exported to a single Excel file, one report per tab. If there is a report you don't need, simply right click its tab in Excel and choose Delete.
